

MID-ATLANTIC FAIRWAYS

Welcome to Rotation Nation

Because the future of our industry depends on the efficacy of our products, we've established Rotation Nation. PBI-Gordon has developed fungicide rotation programs to meet the specific needs of each region, while managing resistance by enlisting a variety of products and active ingredients, including the proven performers in our fungicide line:

- ★ **Kabuto® Fungicide SC**
Excellent control of dollar spot and Spring dead spot!
- ★ **Segway® Fungicide SC**
Proven protection against Pythium disease.
- ★ **Tekken™ Broad Spectrum Fungicide**
One application rate controls 21 diseases for up to 28 days.

No matter what region you're in, PBI-Gordon fungicides are formulated to play a powerful role in your rotation program.

Disease management concerns in the Mid-Atlantic vary drastically based on location and turf species. Disease management on bentgrass fairways focuses on the control of dollar spot, brown patch, Pythium root rot, Pythium blight, Summer patch, and general summer stress. Bermudagrass in this region is at risk of leaf spot, large patch, and Spring dead spot.

Although not included in the spray program for the mid-Atlantic, warm-season turfgrass species in this region may necessitate fall applications for the prevention of Spring dead spot and large patch.

APP#	TREATMENT	TYPE	RATE	UNIT	APP DATE	FRAC	ACTIVE INGREDIENTS	DISEASES CONTROLLED
1	Secure® Fungicide	F	0.50	fl. oz./1,000 ft ²	April 15	29	Fluazinam	Dollar spot, Leaf spot
