

# MIDWEST FAIRWAYS

## Welcome to Rotation Nation

Because the future of our industry depends on the efficacy of our products, we've established Rotation Nation. PBI-Gordon has developed fungicide rotation programs to meet the specific needs of each region, while managing resistance by enlisting a variety of products and active ingredients, including the proven performers in our fungicide line:

- ★ **Kabuto® Fungicide SC**  
Excellent control of dollar spot and Spring dead spot!
- ★ **Segway® Fungicide SC**  
Proven protection against Pythium disease.
- ★ **Tekken™ Broad Spectrum Fungicide**  
One application rate controls 21 diseases for up to 28 days.

***No matter what region you're in, PBI-Gordon fungicides are formulated to play a powerful role in your rotation program.***

Fungicide application recommendations for disease management on fairways in the Midwest are selected primarily for the control of anthracnose, dollar spot, and brown patch. Mid-summer preventive applications for Pythium foliar blight are also included in the program.

Although applications for the control of snow mold are not included in the program, preventive spray programs for pink snow mold prior to snow cover are warranted.

APP#	TREATMENT	TYPE	RATE	UNIT	APP DATE	FRAC	ACTIVE INGREDIENTS	DISEASES CONTROLLED
1	Secure® Fungicide	F	0.50	fl. oz., 1,000 ft <sup>2</sup>	April 15	29	Fluazinam	Dollar spot, Leaf spot
