

NORTHEAST FAIRWAYS

Welcome to Rotation Nation

Because the future of our industry depends on the efficacy of our products, we've established Rotation Nation. PBI-Gordon has developed fungicide rotation programs to meet the specific needs of each region, while managing resistance by enlisting a variety of products and active ingredients, including the proven performers in our fungicide line:

- ★ **Kabuto® Fungicide SC**
Excellent control of dollar spot and Spring dead spot!
- ★ **Segway® Fungicide SC**
Proven protection against Pythium disease.
- ★ **Tekken™ Broad Spectrum Fungicide**
One application rate controls 21 diseases for up to 28 days.

No matter what region you're in, PBI-Gordon fungicides are formulated to play a powerful role in your rotation program.

Fungicide application recommendations for disease management on fairways in the Northeast focus on the control of dollar spot brown patch, leaf spot, and mid-summer preventive applications for Pythium blight.

While not included in the spray program, preventive applications for control of pink and gray snow mold are often necessary throughout much of this region, and should be applied just prior to the first significant snowfall.

APP#	TREATMENT	TYPE	RATE	UNIT	APP DATE	FRAC	ACTIVE INGREDIENTS	DISEASES CONTROLLED
1	Daconil Ultrex® Fungicide	WG	3.20	oz., 1,000 ft ²	May 1	M5	Chlorothalonil	Dollar spot, Leaf spot
